## Summary

Team player web developer with a can-do attitude, phenomenal time management skills and strong user focus. Has developed several web applications including a fintech application that lends individuals and businesses money based on a social reputation algorithm.

## Education

### **Master of Science, Computer Science**

Texas A&M University, Kingsville, Texas

GPA – 4.0 - **May 2020**

### **Bachelor of Science, Chemical Engineering**

University of Lagos, Lagos

GPA – 3.2 - **June 2014**

**Relevant Courses:** Software Engineering, Web Programming, Database Systems & Design, Compiler Design, Computer Communication Networks, Analysis of Algorithms, Cloud Computing, Data Mining.

## Work Experience

### **Systems Engineer, Tech Advance**

**November 2017 – May 2018**

- Analyzed user needs and software requirement to determine feasibility of time and cost constraints. Analyzed and designed program logic to determine the best method of accomplishing requirements. Emerging technologies/trends were considered.
- Developed software system testing and validation procedures and programming i.e. store, retrieve and manipulate data for analysis of system capabilities and requirements
- Wrote well designed, structured, testable code that meets industry standards by using best software practices.
- Reviewed existing systems and provided ideas for system improvement i.e. reprogramming, expanding/updating and scaling.
- Documented and maintained software functionality.

### **Backend Developer, True Rebel**

**January 2017 – Nov 2017**

- Built an inventory web application with (Laravel, VueJS) to track sales, stocks and performance which increased personnel efficiency.
- Built, implemented and maintained user-friendly applications & backend services demonstrating service-oriented architecture and focus on clients' needs.
- Provided maintenance and support to existing systems.

### **Intern Web Developer, Bincom ICT**

**March 2016 – January 2017**

- Worked on multiple areas on sociallenderng.com (an application that lends individuals & businesses money based on a social reputation algorithm) from the front end development (HTML, CSS, JavaScript & jQuery) to back-end (PHP, Yii) & manual testing.
- Worked with senior developers as a web developer within an agile software development team to manage large complex projects for corporate clients.
- Collaborated with designers to create interfaces in HTML, CSS, JavaScript & jQuery for static & dynamic sites.
- Carried out quality assurance tests to discover errors and optimize usability.
- Learnt JIRA as a management tool.

## Skills

- HTML, CSS, JavaScript, Nodejs, PHP (Laravel), MySQL, Python (Django), React/Redux, Vue/Vuex, MS Office (Word, Excel, Outlook, PowerPoint).

## Professional Development and Leadership Experience

- National Society of Black Engineers (NSBE)

**September 2018 - Present**
